

The only trade fair for the moulding industry

Bydgoszcz is the industrial capital of the Kuyavian-Pomeranian Voivodeship, producing parts or dedicated moulds for practically all car brands. The moulding industry also cooperates with the cosmetic, packaging, medical, electronic and household appliances industries. There is a good reason why Bydgoszcz and voivodeship is hailed as the Polish Tools Valley. Combined with its state-of-the-art exhibition infrastructure, the potential of the region creates ideal conditions for the constant growth of the **INNOFORM**® Trade Fair. The next edition of the event is planned for **3rd-5th March 2020**.

Knowledge and business all in one place

Innovative technologies, cutting-edge products and a real opportunity for a new fruitful business partnership are some of the obvious advantages of the **INNOFORM**® Trade Fair. Its added value lies in industry meetings: conferences, training, workshops and booth presentations. The agenda features an important **Brokerage Event**, which has hosted more than two hundred meetings devoted to several hundred projects since the first edition of the trade show.

*We came to **INNOFORM**® for the first time last year. Afterwards, it took us only 2-3 months to close the deal for the sale of 3 machines! The seeds had been sown here at the trade show. From the very first minute, I felt that this edition would also be very successful. I was right: clients crowded to our booth all the time; I held talks back to back. If I could clone myself, my clone would have had its hands full all the time (laugh). I'm very impressed; we gained many new clients.*

Mateusz Haberski
Sales Engineer (Northern Region),
High Technology Machines

*I believe that this year there's been more interest in **INNOFORM**®; there are more business-minded companies and people who come with specific queries, looking to start a cooperation. It definitely makes sense to further develop the Industrial Cooperation Zone; it's always good to cooperate with the competition. To my mind, cooperation is exactly what we need. We will meet at **INNOFORM**® next year; it would be a wasted year if we didn't come.*

Service companies are regularly invited to the **Industrial Cooperation Zone**, where entrepreneurs wishing to present their production capabilities and acquire new commissions can take advantage of small, fully-equipped display booths. In response to the demands of the job market, we have also launched a **Career Zone**, targeted at all job seekers and employers. Such a wide selection of accompanying events is sure to make participation in **INNOFORM**® more effective than ever.

The thematic range of the Trade Fair:

- tools for plastics processing: injection moulds, blow moulds, extrusion heads, rubber processing moulds
- cutting tools
- technologies, equipment and materials for reverse engineering
- technologies, machine tools and equipment for removal processing, joining and coating of metals
- technologies, machinery and equipment for surface treatment and finishing
- plastics processing
- materials, raw materials: steels, semi-finished products, actuators, standardised machine elements, electrical fittings
- lubricants, coolants and their ingredients
- control and measurement instrumentation
- technological equipment
- modeling, visualization and simulation of the injection molding process
- specialized CAD/CAM/CAE software
- blanking dies, press tools, wire cutting
- equipment for industrial plants
- automation and robotisation of manufacturing
- recycling
- logistics
- services

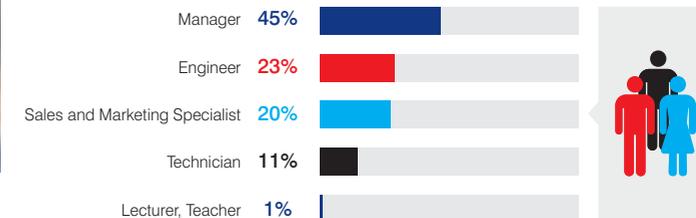

This is our first time at INNOFORM® and we were pleasantly surprised with the turnout. Our booth was visited by many regular clients, but we are particularly happy about the great number of new contacts, which we hope will lead to new business relations. We noticed that the trade show is mostly local, since the bulk of companies came from neighbouring voivodeships, but there were also some clients from other regions.

Przemysław Wrona

Kipp Polska Ltd.

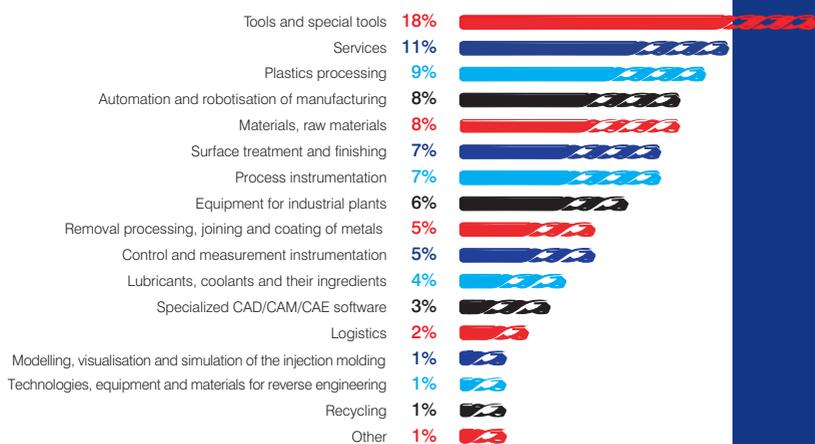

ORIGIN OF THE EXHIBITORS*

VISITORS BY OCCUPATIONAL POSITION*

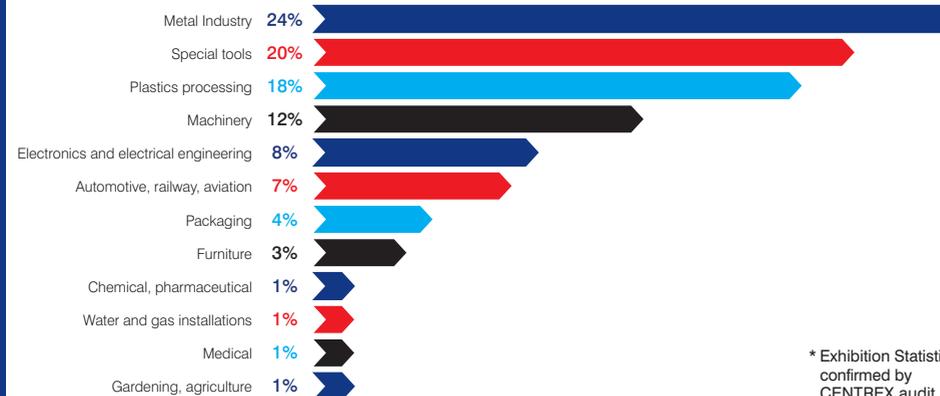

EXHIBITORS BY INDUSTRIAL SECTOR*

This is our first time at INNOFORM®; we came to distribute Universal Robots, our cooperating robots. I am pleasantly surprised. I didn't have high hopes for the event, I just wanted to check it out. There are a lot of visitors who come to the booth not only to chat but to discuss specific issues, and that's the best thing. It is an excellent chance for us to forge even more contacts in the industry. I can see great potential here.

Tom V. Jorgensen
Owner at Jorgensen
EasyTech

VISITORS BY INDUSTRIAL SECTOR*

It's our first time at INNOFORM®. The organization and customer service are very good and efficient; we're very satisfied. Meetings and talks with clients are also OK... Contrary to what we expected, we have met people from all over Poland, not only from the region. It's worth making an appearance at the trade show because it is also attended by a large number of our competitors
